Applicant's election of Group I, Claims 1-4 and amended claims 17-23, in papers submitted October 9, 2003 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 17-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rovedo et al and Parducho et al.

Rovedo et al disclose dulce de leche in combination with starch (see abstract).

Parducho et al disclose a composition comprising milk, sugar, and starch (see abstract).

The claims differ as to the specific recitation of amounts, density, solubility, and fluidity.

The desired product is merely dictated by consumer preference. At most the amounts are seen to be no more than optimization, see *In re Boesch* 205 USPQ 215.

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made to manipulate the amounts of Rovedo et al and Parducho et al and to obtain the desired density, solubility, and fluidity because the use and manipulation of

dulce de leche products is conventional in the art, and the desired product is merely dictated by consumer preference.

Attention is invited to *In re Levin*, 84 USPQ 232 and the cases cited therein, which are considered in point in the fact situation of the instant case, and wherein the Court stated on page 234 as follows:

This court has taken the position that new recipes or formulas for cooking food which involve the addition or elimination of common ingredients, or for treating them in ways which differ from the former practice, do not amount to invention, merely because it is not disclosed that, in the constantly developing art of preparing food, no one else ever did the particular thing upon which the applicant asserts his right to a patent. In all such cases, there is nothing patentable unless the applicant by a proper showing further establishes a coaction or cooperative relationship between the selected ingredients which produces a new, unexpected, and useful function. *In re Benjamin D. White*, 17 C.C.P.A. (Patents) 956, 39 F.2d 974, 5 USPQ 267; *In re Mason et al.*, 33 C.C.P.A. (Patents) 1144, 156 F.2d 189, 70 USPQ 221.

GB 705059, JP 62-244343, and JP 62-236442 are all show the addition of polysaccharides to milk products, and are cited as of interest
